Who Are We?

[Sovereign Laboratories](#) is a **pioneer** and **world leader** in the research and development of bovine **colostrum** for human consumption. Colostrum is simply the most important and studied food supplement in the world. Colostrum is nature's first food for all mammals. The **many benefits** to human health from colostrum supplementation are broad-based and supported by many scientific studies.

Colostrum, though naturally occurring, requires state-of-the-art processing in order to be absorbed by the body for maximum overall health results. All of Sovereign Laboratories' colostrum products are manufactured in the world's most technologically-advanced colostrum production facility, the only plant dedicated solely to manufacturing colostrum for human consumption. Furthermore, Sovereign Laboratories pioneered the liposomal delivery system, which has proven essential for maximum bioavailability and potency.
